What Our Client Says

Rupesh Kumar

We switched from NewRelic RUM to Gemini and have been using it for nearly a year now and very happy with it. What we love about Gemini, it gives real time alerts for the performance degradation.

Director of Engineering - Bigbasket

How We Work

The Gemini real user monitoring tool helps companies Monitor 40+ user experience parameters, Detect end user java script issues and page level discrepancies and Alert on the Core Web Vitals and traffic Degradation.

With our complimentary expert site speed recommendations, companies can improve their user experience and uplift the engagement and revenue.

Gemini Benefits

A fast website can boost conversions and generate more revenue. Users are more likely to browse than bounce from a better performing site. Google penalizes slow website. Speeding up your site on Core Web Vitals will help with SEO.

Wizard Benefits

Blazingly fast sites delight the users. Our engagements provide top notch customer satisfaction with best return on investment. We provide complimentary support and long term coaching for performance best practices and implementations.
